

Quantifying Import/Export of Population-Weighted PM_{2.5} through Satellite-Constrained Adjoint Sensitivity Analysis

Luke Reed*¹, Daven K. Henze¹, Aaron van Donkelaar², Randall V. Martin²

¹University of Colorado, Boulder, Colorado, ²Dalhousie University, Halifax, Nova Scotia, Canada

What control does each nation have over its PM_{2.5} levels?

Given the effect of PM_{2.5} on health, what are the most important emissions by species and sector for each region?

What is an emissions 3D Jacobian and what does it tell us?
