

# Feedback effect of products outsourcing on regional atmosphere pollution in China (C.10)

*H.Y. Zhao, Q. Zhang, X. Li, D.B. Guan, J.T. Lin, Z. Liu, L. Zhang, K.B. He*

- We developed a linkage between **Multi-Regional Input-Output (MRIO) model** and **GEOS-Chem adjoint model**.
- PM<sub>2.5</sub> air pollution in a specific region of China was attributed to different regions' consumption activities.
