

Postdoctoral Position in Structural and Evolutionary Biology at Harvard University

The Ovchinnikov Lab at the Harvard University is offering a fully funded postdoctoral position in the field of structural and evolutionary biology. Sergey's lab is interested in 1) Developing an improved and unified statistical model of protein evolution; 2) Applying the model to mine metagenomic “dark matter” sequences to discover new protein families, functions, and protein-protein interactions; 3) Probing the evolution of multicellularity through comparison of structures and interactions in the early tree of life. For more information see: solab.org

Applicants with a background and interest in evolution, phylogenetics, structural biology, metagenomics, machine learning and/or bioinformatics are encouraged to apply.

To apply, please send a CV, a 2-page statement of research experience and interest, and the names and contact for three references to Sergey Ovchinnikov to: so@fas.harvard.edu.

Harvard University is an Equal Opportunity/Affirmative Action Employer.
