Governance Models
Governance: Generally
<table>
<thead>
<tr>
<th>Governance</th>
<th>The complexity of Governance is difficult to capture in a simple definition. The need for governance exists anytime a group of people come together to accomplish an end. Though the governance literature proposes several definitions, most rest on three dimensions: authority, decision-making and accountability.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Internet Governance</td>
<td>The primary task of Internet governance involves the design and administration of the technologies necessary to keep the Internet operational and the enactment of substantive policy around these technologies.</td>
</tr>
<tr>
<td>Corporate Governance</td>
<td>At its broadest, corporate governance encompasses the many components of the systems by which companies are directed and controlled.</td>
</tr>
</tbody>
</table>

---

Governance: OpenDP
Enable and encourage contributions from a diverse community (balancing principles & practical deployment)

Encourage adoption of OpenDP software for target use cases

Facilitate collaboration & partnership among individuals, businesses, academic inst’ns, gov agencies, etc.

Create diverse and inclusive community in which stakeholders have a voice

Maintain a well-defined process for contribution, vetting, and testing to ensure transparency and quality

Ensure OpenDP has resources needed to meet strategic directions and sustain the project (incl private sector contributions) while maintaining community-driven mission

Transform and evolve through org’s lifecycle stages

The OpenDP White Paper, p. 14
