- Questionnaire -

**Genetic Genealogy as a Window into Genomic Science:
Racial Boundary Blurring and Reification**

Contact Information: Jennifer Hochschild
Harvard University
Hochschild@gov.harvard.edu
Office: 617-496-0181
Home (best in summer): 617-264-2040

Harvard University
Department of Government
CGIS: 1737 Cambridge Street
Cambridge MA 02138

Design: We plan four short vignettes that will specify hypothetical individuals of various racial and ethnic backgrounds who have submitted their DNA for genealogical testing. The vignette will provide the test's "results," manipulating them as explained below. Respondents are then asked to react to the posited results. The four questions, the three response categories, and the positive or negative pole within each response category will be randomly ordered. The gender of the hypothetical person will match that of the respondent. The race of the hypothetical person will match that of the respondent for questions 1 and 2, but will differ from that of the respondent for questions 3 and 4. (For purposes of this survey experiment, we will treat black, white, Hispanic, Asian American, and multiracial as mutually exclusive and conceptually identical "races.")

We are requesting that the respondent see a map of the world while answering all of the questions, with each continent a different color and country boundaries visible but no country names included. Examples are:

http://ed101.bu.edu/StudentDoc/current/ED101sp09/tshulin/continents_map_sm.jpg

<http://maps-world.cn/map/world-continents-map.gif>

We request equal sized samples of self-identified non-Hispanic Blacks, Latinos, Asian Americans, non-Hispanic Whites, and multi-racials, from a national population of adults over age 18. With 200 in each of five groups, and with each respondent receiving twelve questions, that totals 12,000 respondent-questions. Please let us know the additional charge beyond what TESS normally permits (8000 respondent-questions.)

If possible, we would like to add a larger sample size to each of the five categories of respondents. Please let us know how much these additions would cost, so that we can decide if it is feasible. We would also appreciate a conversation with TESS or KN about the feasibility and cost of permitting the Hispanic sample to be interviewed in either English or Spanish, as the respondent wishes.

Sample: 1000 respondents [divided equally into self-identified non-Hispanic Blacks, Latinos, Asian Americans, non-Hispanic Whites, and multi-racials] x 4 items, each with 3 responses = 12,000 respondent-items.

Additional profile items:

- 1) 2008 presidential candidate voted for
- 2) ancestry
- 3) US citizenship
- 4) attitudes about technology and new technology products

- If African American, use Africa.
- If White, use Europe or the Middle East.
- If Hispanic, use Latin America or Spain.
- If Asian American, use Asia.
- If 2+ races, use 2 continents, randomly chosen.
-

Show map with the continents distinctly identified in separate colors.

3 forms of randomization: 1) among the 4 questions; 2) among the 3 response categories; 3) between the positive and negative pole, or “matter a lot/not matter at all” within each response category.

For the responses under A. for each question, we request a 7 point scale with labels – that is, tick boxes labeled “completely xx; mostly xx; somewhat xx; neither xx or not xx (as in, “neither pleased nor displeased”), somewhat not xx, mostly not xx, completely not xx” (with appropriate modifications to fit the responses). We do not want to include a tick box for “no opinion.” If the respondent does not complete the item on the screen, we ask KN for a prompt to encourage him/her to do so – but if the respondent still does not answer, then the next screen should appear, with “NA” as the coded response.

If possible, it would be valuable to have a location on the screen where the respondent can enter a volunteered or open-ended response to any of the questions.

*****PROGRAMMING*****

[PROGRAMMER NOTE:

THERE ARE 2 LEVELS OF RANDOMIZATION FOR THIS SURVEY. THE FIRST LEVEL OF RANDOMIZATION IS FOR THE QUESTION SETS. THE QUESTION SETS ARE DEFINED AS:

Q1A1 to Q1B1

Q2A1 to Q2B1

Q3A1 to Q3B1

Q4A1 to Q4B1

THE SECOND LEVEL OF RANDOMIZATION IS WITHIN THE QUESTION SETS. THEREFORE, PLEASE RANDOMIZE AND RECORD THE ORDER OF QUESTIONS IN Q1A1 TO Q1B1, Q2A1 TO Q2B1, Q3A1 TO Q3B1, Q4A1 TO Q4B1.

PLEASE ALSO ROTATE AND RECORD THE ASSIGNMENT OF THE RESPONSE CATEGORY ORDER FOR ALL QUESTIONS. THEREFORE, THE RESPONSE CATEGORIES CAN EITHER GO FROM POSITIVE TO NEGATIVE, OR GO FROM NEGATIVE TO POSITIVE.

FOR ALL RANDOMIZATIONS, PLEASE RECORD.

FOR THE IMAGES, USE MAP1 TO MAP14. THEY SHOULD BE USED IN THE FOLLOWING MANNER:

1. MAP1: for DISPLAY1 , DISPLAY3
 2. MAP2: for DISPLAY2, DISPLAY4, ONLY IF XRACEGROUP TEXT INSERT IS “Africa”.
 3. MAP3: for DISPLAY2, DISPLAY4, ONLY IF XRACEGROUP TEXT INSERT IS “Europe or the Middle East”.
 4. MAP4: for DISPLAY2, DISPLAY4, ONLY IF XRACEGROUP TEXT INSERT IS “Latin America or Spain”.
 5. MAP5: for DISPLAY2, DISPLAY4, ONLY IF XRACEGROUP TEXT INSERT IS “Asia”.
 6. MAP6: for DISPLAY2, DISPLAY4, ONLY IF TEXT INSERT IS “Europe or the Middle East and Africa”.
 8. MAP8: for DISPLAY2, DISPLAY4, ONLY IF XRACEGROUP TEXT INSERT IS “Europe or the Middle East and Asia”.
 10. MAP10: for DISPLAY2, DISPLAY4, Q4B1 ONLY IF XRACEGROUP TEXT INSERT IS “Africa and Latin America or Spain”.
 11. MAP11: for DISPLAY2, DISPLAY4, ONLY IF XRACEGROUP TEXT INSERT IS “Africa and Asia”.
 14. MAP14: for DISPLAY2, DISPLAY4, ONLY IF XRACEGROUP TEXT INSERT IS “Asia and Latin America or Spain”.
- MAPX: DISPLAY2, DISPLAY4, ONLY IF XRACEGROUP TEXT INSERT IS “Europe or the Middle East and Latin America or Spain”.

[NAME/GENDER INSERTS SAME AS R’S GENDER]

[DISPLAY1]

[Christopher/Emily] is a [man/woman] who identifies as [USE XRACGRP FOR RACE INSERTS: African American/White/Hispanic/Asian American/ mixed race]. [She/He] has taken a DNA test that indicates that [his male/her female] lineage is *spread across* Europe or the Middle East, Africa, North America, Latin America or Spain, and Asia. If you were [Christopher/Emily], how would you feel about that?

[SP]

Q1A1. Would the result make you feel...

[SP]

QEG22. Are you a citizen of the United States?

Yes 1
No 2

[IF xCOMP=2]

[GRID - SP ACROSS, MP DOWN]

COMP1. Below is a list of statements, which may or may not be used to describe your attitudes toward technology, entertainment, and your lifestyle. **[SHOW ON SCREEN 1 ONLY]**

[SPACE]

Please indicate whether you agree or disagree with the following statements.

	Strongly Agree	Somewhat Agree	Neither Agree nor Disagree	Somewhat Disagree	Strongly Disagree	Not Applicable or Not Familiar

[ROTATE LIST, PRESENT 5 ITEMS EACH ON 3 SCREENS]

Others often rely upon me to stay up-to-date about the latest technology
 I look forward to a day when all of my devices (i.e. computer, MP3, mobile phone) work together
 I tend to buy a new technology, media device, or service as soon as I see it is available
 I like to surf the Internet as a form of entertainment
 The ability to access digital video from the Internet has made me less likely to watch television using a traditional TV
 I consider the illegal downloading of movies, music and other digital content to be as bad as shoplifting
 I like to upload video content that I create onto the Internet (such as YouTube)
 I use social networking to communicate with others more than email and instant messenger
 Blogging is a great way for me to express my opinions
 I am open to there being advertising on mobile phones provided I receive something in return
 I would rather pay to watch a TV show or movie than have to view advertising

The state of the economy has led me to delay some technology purchases
 I prefer to buy electronics or technology products from a physical retail store
 I prefer to buy technology brands that are environmentally conscious in their choice of materials and product recycling programs
 I always buy the lowest priced electronics or technology products
