# Archetypes in a Dataverse

**Asteroid** You have small data sets you'd like to see stay in reliable orbits.

Protostar You're young and eager to become a full-grown star, so you want to share all the data you can, and embed links to it in your publications.

Main-sequence Star You've been at this for a while, so you have long data history and a good future. You'd like to upload important data to go with "old" papers now, and more in the future.

Cluster You collect things in catalogs and lists, and you want to group the catalogs for the greater good.

Supernova Your disks are EXPLODING with data, and you don't know what to do with it. You want to permalink vast data sets directly to papers, and more...

Pulsar You really like it when things *change*. Time-domain astronomy is your thing, and you want online identifiers that understand time.

Galaxy You love everything, but you're organized. You make and collect Surveys you don't want to lose, and you want people to find them from far away.

Quasar Your energy is nearly unlimited, so you suck up (mine) and spit out as much data as you can find. And you like to share in showy ways.

Black Hole You suck down any and all data, with unbridled appetite. Dataverse is *NOT* for you.

The **Dataverse Network**® Project
